Labeling A Custom Board

1. When labeling a custom BxBoard, it is important that each abbreviation clearly represents the site location. When creating abbreviations be sure to not use the same abbreviation for different locations.

Common Abbreviations include:

LES - Lesion

ROI - Region of Interest

LSV - Left Seminal Vesicle

RSV - Right Seminal Vesicle

LTZ - Left Transitional Zone

RTZ - Right Transitional Zone

LAH - Left Anterior Horn

RAH - Right Anterior Horn

LPM - Left Posterior Medial

RPM - Right Posterior Medial

LPZ - Left Peripheral Zone

RPZ - Right Peripheral Zone

IMPORTANT: If a lane is empty, you MUST label the lane empty using the Ø symbol.

Example:

Left Tissue Board

X1

Right Tissue Board

X1
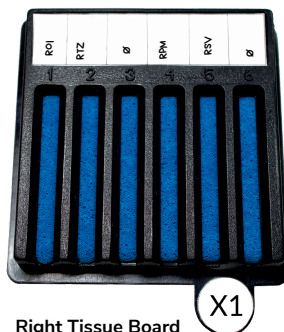

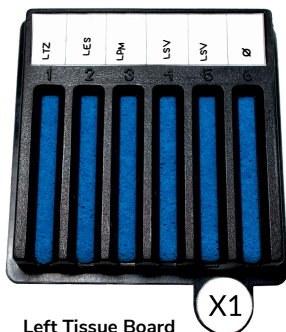

Left and Right tissue MUST be on separate boards.
